

The National Asphalt Research Consortium (NARC) in association with the Institute of Asphalt Technology (IAT) invites you to a ½ day Conference

Title: **Road surfaces of the future**

Date: 17th September 2025

Time: 12.30 register and lunch; 1.30-4.30 conference

Location: C16 Pope Building, University of Nottingham (Building 27 on Campus map)

Speakers will include:

- Alexander Hewstone, Sima-Asphalt
- Rodrigue Maggi-Nironi, Ecopals
- TT Lim, Carbonpave
- Jett Yang, Uberbinder
- Jason Lee, C-Twelve

This event will take a look into the possible future of road surfacing in a cost-conscious, durability-conscious and carbon-obsessed world. The materials that the speakers will present will include both hot and cold asphalts, novel polymers, recycled plastics, sulphur and biochar. The format will consist of short presentations on each material and structured panel-led discussion with full audience participation. The panel will be made up of recognized industry experts.

Cost: Free to speakers and NARC member organisations, up to 3 participants

£75+VAT for all other attendees

Travel advice:

- Car parking should be available at the University (Main visitor car park on Campus map); availability is not guaranteed and charges apply
- Otherwise access by tram from the Park & Ride at Toton (off the A52 about 1 mile from Junction 25 of M1) or from Nottingham railway station
